

Company

GSL GLOBAL SHIPPING AND LOGISTICS CONSULTING is a consulting company specializing in *Logistics and Supply Chain Optimization*. It supports companies and organizations by adopting an innovative approach to optimize their logistics systems (order processing, warehousing, transportation, distribution, reverse) as part of the business process, national and worldwide.

Operations Efficiency Assessment

Practical tested „Operations Audit“ for companies and organisations

Your need for analysis

As ISO-certified auditors, we have developed especially for our customers, the analysis tool **e-flow-optimizer**.

With experienced auditors, we analyse for you on the **board of directors, CEO's and CFO's** following areas as part of or overall process:

- Flow of goods
- Flow of documents
- Flow of information
- Flow of finances

Your benefits

As decision-maker and person-in-charge, you will get a neutral and external assessment of a detailed and transparent insight into your company.

You can count on the following concrete benefits:

- Identification of overcapacity and further problem areas with appropriate improvement proposals and indication of significant **cost-saving potentials**.
- Ad-hoc-measures: Action plan with **immediate measures** to be taken on existing processes (Quick Wins).

- Structural measures: Deliver concrete, **medium - and long-term recommendations** with related action plans and implementation details.

- New processes
- Process optimisation and standardisation
- Rise in productivity
- Resource adjustment (supplies, employees)
- Quality improvement
- Interface optimisation
- Organisational structure

- Risk-Management: Identify **weak points and sources of danger**.
- Staff Management: Evaluate of education and training needs and any deficiency in organisation and communication.
- High **cost-benefit-ratio** guaranteed. (audit expenses and time versus savings)

Your possible problems

For the following questions, you will get from us fast and practical solutions:

- Do we have high costs in the flow of goods?
- Can transparency, effectiveness and efficiency of our processes be improved?
- Are our machines and / or personnel at working capacity and our resources optimal planned?

- Where do we stand in comparison to our competitors? (Benchmarking)
- Are our risks known, assessed with measures to reduce them in place or at least initiated?
- Are our processes best in class and focused on our internal and external customers?
- How operational and customer friendly are our processes in our customer complaints department?
- Does our personnel management correspond with our quality and quantity objectives?

Our benchmark competence

Thanks to our unique methodology as well as our long and worldwide experience, we have practical experience and benchmark competence in the following industries:

- Retail business
- Textile industry
- Machine industry
- Freight Forwarding
- Transportation
- Postal services (KEP & Mail)

Our analysis tool and our methodology

Our analysis tool **e-flow-optimizer** is tailor made to identify and analyse:

- Strengths
- Weakness
- Effectivity
- Efficiency (Utilization test)
- Risks (failure mode and effect analysis - FMEA)

And how do we work? Practice-oriented and fast! Through practical experience and auditing current processes and work flow on site.

Your personnel will be integrated through interviews and observations by our specialised audit team. It goes without saying that all collected data will be kept in strict confidence.

The entire **Audit duration will be maximum 6 days** and divided in 2 days of preparation, 2 days of audit at site and 2 days of analysis and report. Hence, time at site for a sector, defined in advance, will take not more than 2 days.

On the 7th day we will present you the complete audit report. All expenses for the Audit are clearly defined and therefore known well before the start of the project.

Our offer

We will be pleased to submit you a non-binding quotation.

Please do not hesitate to submit to us your specific problems. We guarantee you a positive cost and benefit ration. By all means!
